

Effective, small steps and learner-centred
Basic Education facilities

Development of the 5-steps-model for Small Learning Units (SLUs)

Effective, small steps and learner-centred Basic Education facilities

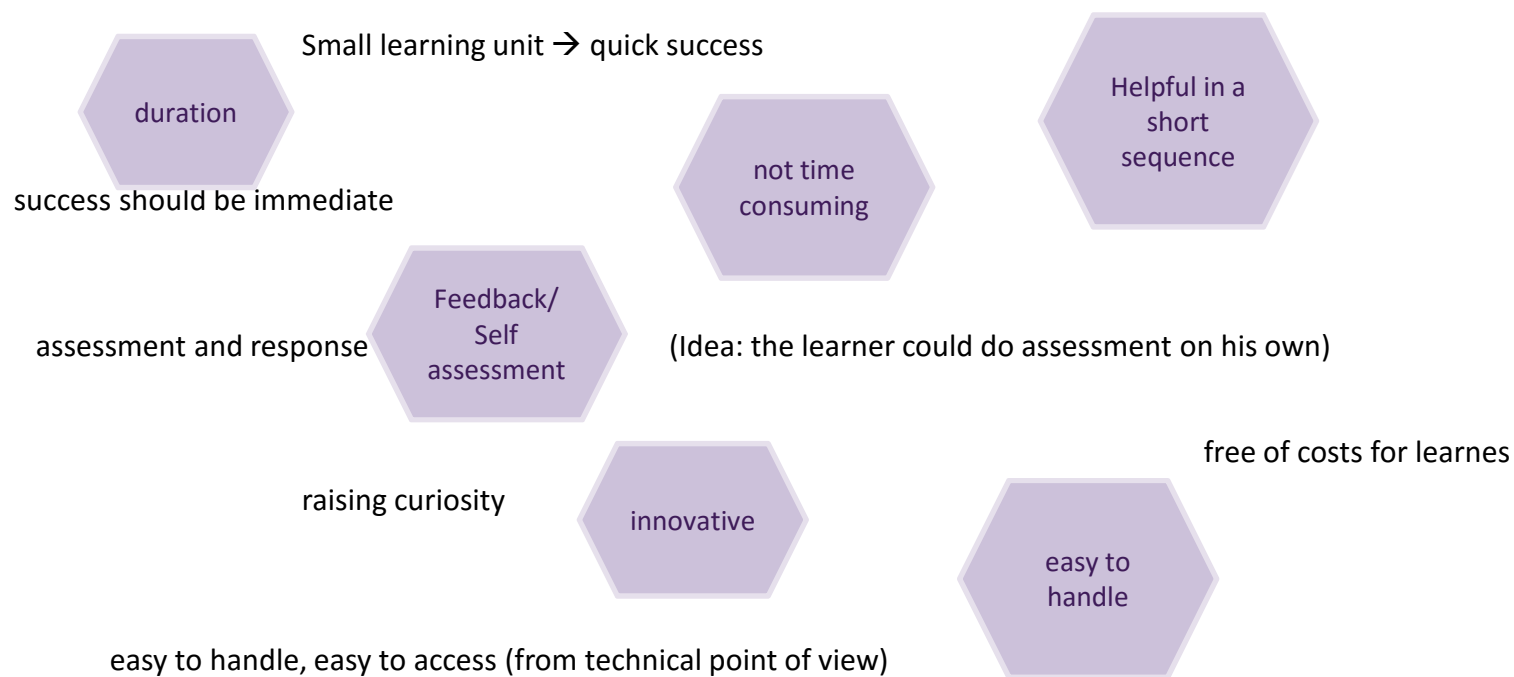

Starting point

- We started with the idea of SLUs for the **target group**: people who have basic skills needs in reading and writing, people with bad learning experience, low-skilled, people with a second (as well as first) chance for their training. Also adult trainers and training experts are included. Furthermore the SLUs could be transferred to other TGs.
- SLUs should work as a **first step into further learning** and therefore be motivating through offering positive learning experiences.

Effective, small steps and learner-centred Basic Education facilities

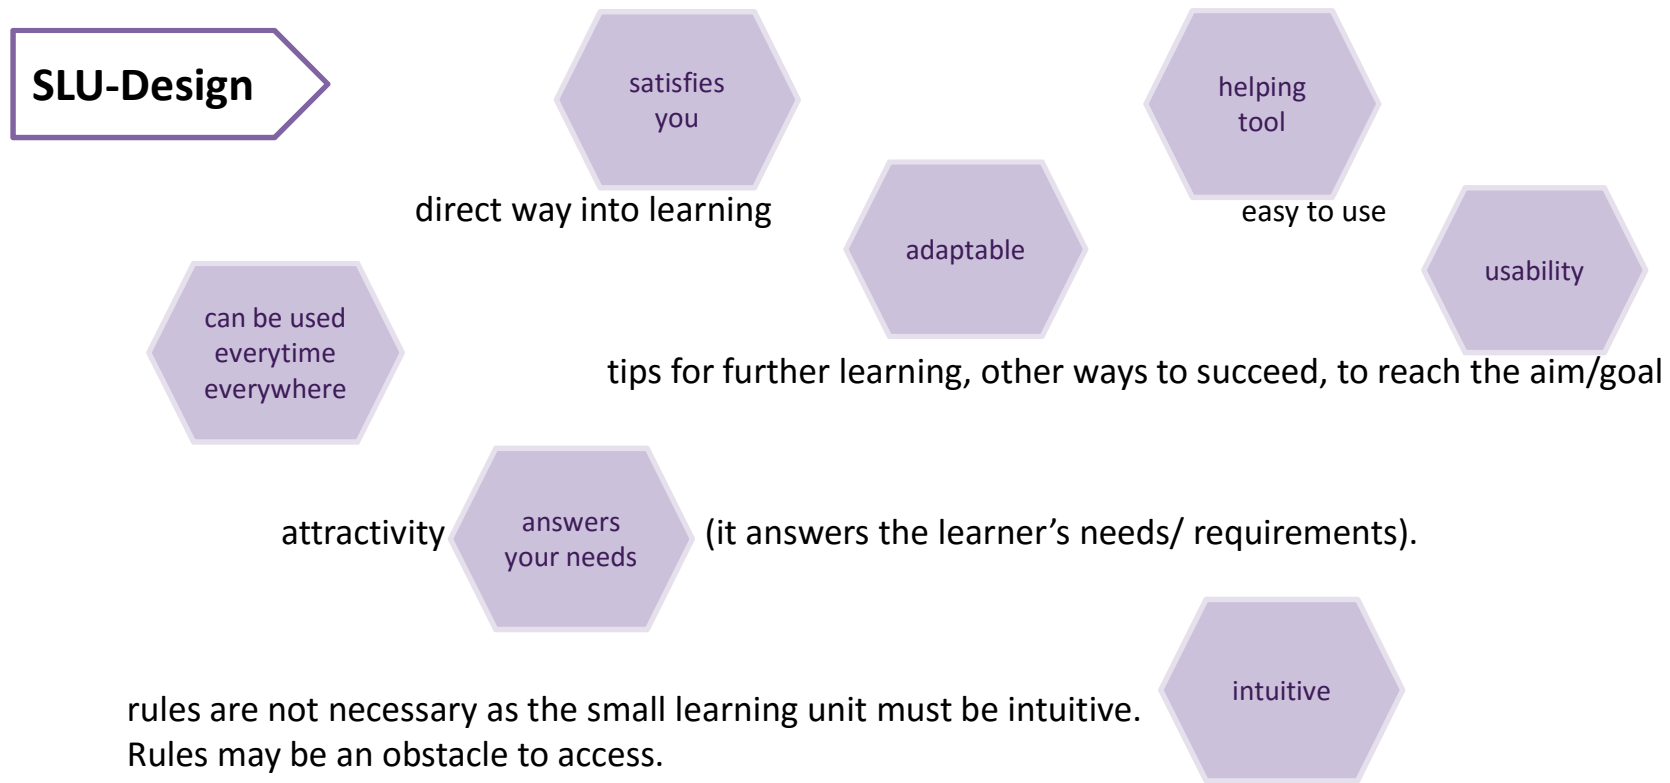

SLU-Design

We worked out **decisive points for the core concept of a small learning unit** to ensure a high quality of the small learning units.

...

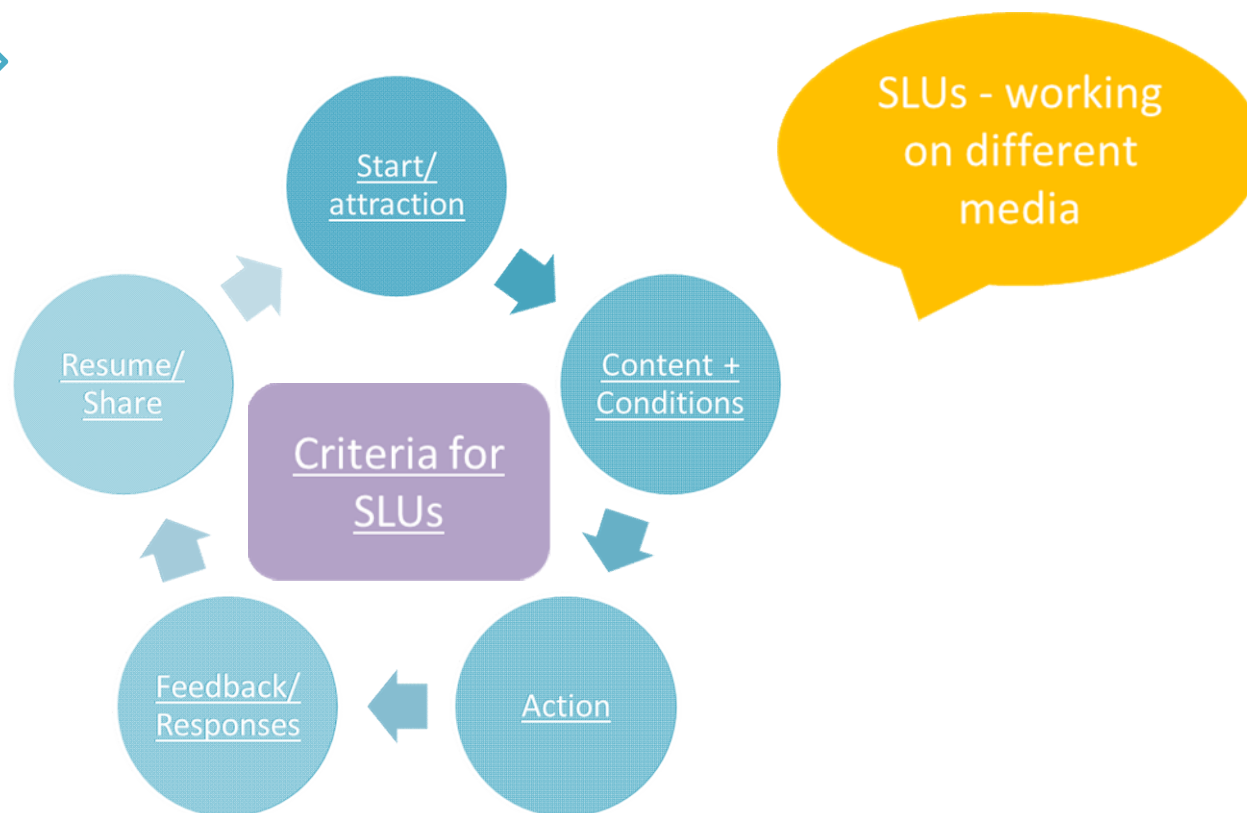

Effective, small steps and learner-centred Basic Education facilities

Based on this we developed our 5-steps-model:

Effective, small steps and learner-centred Basic Education facilities
